

# Gyprock® Ceiling Solutions

## DATA SHEET

### Range Overview

Gyprock® ceiling tiles have a plasterboard core and are used as decorative linings in commercial applications. They are square edged to suit an exposed grid and have various surface finishes. Offering an attractive, economical and functional solution for commercial and industrial ceilings, Gyprock® ceiling systems are used in offices, shops and shopping centres, clubs, restaurants, function centres and community buildings, warehouse and factory buildings. The range of Gyprock® ceiling tile systems suits both decorative and acoustic requirements.

### Gyprock Freshtone™ - Available in Diamond White & Black

Freshtone™ is a Gyprock® plasterboard panel finished with a finely textured vinyl laminate which resists fading and mould growth. Gyprock Freshtone™ is ideal for shopping centres, offices and industrial premises. Freshtone's core features the sag resistance properties of Supacell™.

### Gyprock Supatone™

Gyprock Supatone™ is a plasterboard panel with a 'wipe clean' smooth polycoated surface paper laminate. Supatone™ is available in 'white', and used in basic commercial ceiling applications. Supatone's core features the sag resistance properties of Supacell™.

### Gyprock® Perforated Panel

Gyprock® Perforated Panels have been specifically developed for use in ceilings where additional sound absorption is required. Perforations are approximately 10% of the panel area, and combined with suitable insulation, provide a medium level of acoustic absorption.

## DATA SHEET

**Gyprock Freshtone™**  
Available in Diamond White & Black  
Freshtone™ has a lightly textured vinyl surface suitable for shopping centres, factories and offices.

**Gyprock Supatone™**
